Work History

Quality Assurance Tester 12/2019 to Current

Deep Silver Volition – Urbana, Illinois

- Identified issues or non-desired functionality within the game and wrote clear and concise descriptions of said issues, as well as easy-to-follow steps to reproduce the issues into bug tracking software(Hansoft).
- Communicated with team members as well as developers in order to effectively relay information and help track down which aspect of the game is causing an issue.
- Followed test plans in order to test each aspect of the game and mark them as pass/fail based on desired functionality as well as link the issue that is preventing a pass.

DB Client Calc Automation Specialist 09/2018 to 08/2019

Alight Solutions – Lincolnshire, IL

- Instantiate mathematical formulas within a custom software database in order to calculate client retirement benefits.
- Update/maintain formulas to keep logic on par with requirements.
- Communicate effectively with team to keep up to date on progress and tasks to avoid conflicts.

Education

Bachelor of Arts: Game Design 05/2018

Columbia College Chicago - Chicago, IL
